mendamar.badral@gmail.com | +36 70 7385 744 | Budapest, Hungary

Driven by an open mindset with a strong drive for learning new technologies, I aspire to contribute to developing genuine solutions for real world, impactful problems.

Education

Budapest University of Technology and Economics (BME) — Sep, 2025 – June, 2027
M.Sc. in Computer Science Engineering — Budapest, Hungary
Specialization: Data Science & Artificial Intelligence

National University of Mongolia (NUM) — Sep, 2021 – June, 2025
B.Sc. in Applied Mathematics — Ulaanbaatar, Mongolia
GPA: 3.2/4.0 **(rank 3/34)**
Supervisor: Galtbayar Artbazar
Thesis: Evaluating land degradation using image processing methods

Experience

Center of Mathematics Application Research Lab — Oct, 2023 – June, 2025
Undergraduate Lab Lead & Research Intern

Projects

Data Integration for 3D Gaussian Splatting

– Implemented a custom JSON parser to extract sensor data obtained by aiSim, an autonomous driving simulator by aiMotive, into a nerfstudio (3D reconstruction software) format. Performed LiDAR point cloud sensor fusion with the camera images to obtain color information.

Deep Learning Foundations and Concepts Book Examples Reproduction

– Implemented polynomial regression from Bishop & Bishop's *Deep Learning Foundations and Concepts*, and reproduced key theoretical results in interactive Julia notebooks to empirically analyze **overfitting, underfitting, and the bias–variance tradeoff**.

Awards

Stipendium Hungaricum Scholarship — Sep, 2025

Skills

Languages:	English (C1 IELTS 8.0)
Programming:	Python, SQL, Bash, JavaScript, Julia, C/C++, R
Tools:	Git, Docker, pandas, xarray, sklearn, rasterio, PyTorch, GDAL, OpenCV, nerfstudio
Data Engineering:	Large-scale data processing, multi-threading, relational databases (PostgreSQL/MySQL), file formats (GeoTIFF, Parquet, HDF5)
