 mendamar.badral@gmail.com |  +36 70 7385 744 |  Budapest, Hungary

Driven by a problem solving mindset and fueled by curiosity, I always aspire to develop genuine solutions for the real-world, impactful problems.

EDUCATION

Budapest University of Technology and Economics (BME) Sep, 2025 – June, 2027
M.Sc. in Computer Science Engineering
Budapest, Hungary
Specialization: Data Science & Artificial Intelligence

National University of Mongolia (NUM) Sep, 2021 – June, 2025
B.Sc. in Applied Mathematics
Ulaanbaatar, Mongolia
GPA: 3.2/4.0 (rank 3/34)
Supervisor: [Galtbayar Artbazar](#)
Thesis: [Evaluating land degradation using image processing methods](#)

EXPERIENCE

Center of Mathematics Application Research Lab Oct, 2023 – June, 2025
Undergraduate Lab Lead & Research Intern

- **Leadership:** Selected as Lab Lead for the student team; contributed to the weekly seminars with the professors on the topics such as machine learning and statistical modeling.
- **Work:** Developed a custom, vendor specific **Python program** which takes camera and sensor parameters into account. Collaborated with the team and experimented with the drone imagery data analysis, with the main focus on the problem of detecting weeds from the drone images. Obtained hands-on experience with feature engineering, data analysis and technical communication.
- **Organization:** Responsible for laboratory data backup, file organization.

PROJECTS

[Deep Learning Foundations and Concepts Book Examples Reproduction](#)

- Implemented polynomial regression models from Bishop & Bishop's *Deep Learning Foundations and Concepts* to study **overfitting, underfitting, and the bias–variance tradeoff**.
- Generated synthetic datasets and fit models of varying polynomial degree to analyze how model complexity affects tests and training error.

[Comparative EDA: Housing Affordability in Hungary vs Mongolia](#)

- Performed end-to-end exploratory data analysis (EDA) on public datasets from the [Hungarian Central Statistical Office \(KSH\)](#) and [National Statistics Office of Mongolia](#) to determine: “How many m^2 of a new apartment could a monthly average net wage buy, by region and year?”

AWARDS

Stipendium Hungaricum Scholarship Sep, 2025 – Present

SKILLS

Languages: English (C1 [IELTS 8.0](#)), Mongolian (native)
Programming: Python, Bash, JavaScript, Julia, C/C++, R, MATLAB
Tools: Git, GitHub, Linux, Docker, Pandas, uv, PyTorch, SQLite, $\text{\LaTeX}$
